

2014
BIKE COLLECTION

 **IDEAL**
BIKES

IDEAL BIKES

We love bicycles

The Background

A Greek company, with a history of 87 years, IDEAL has become the “ambassador” of the Greek bicycle industry in Europe by participating in international fairs and exporting bicycles in 19 European countries.

The People

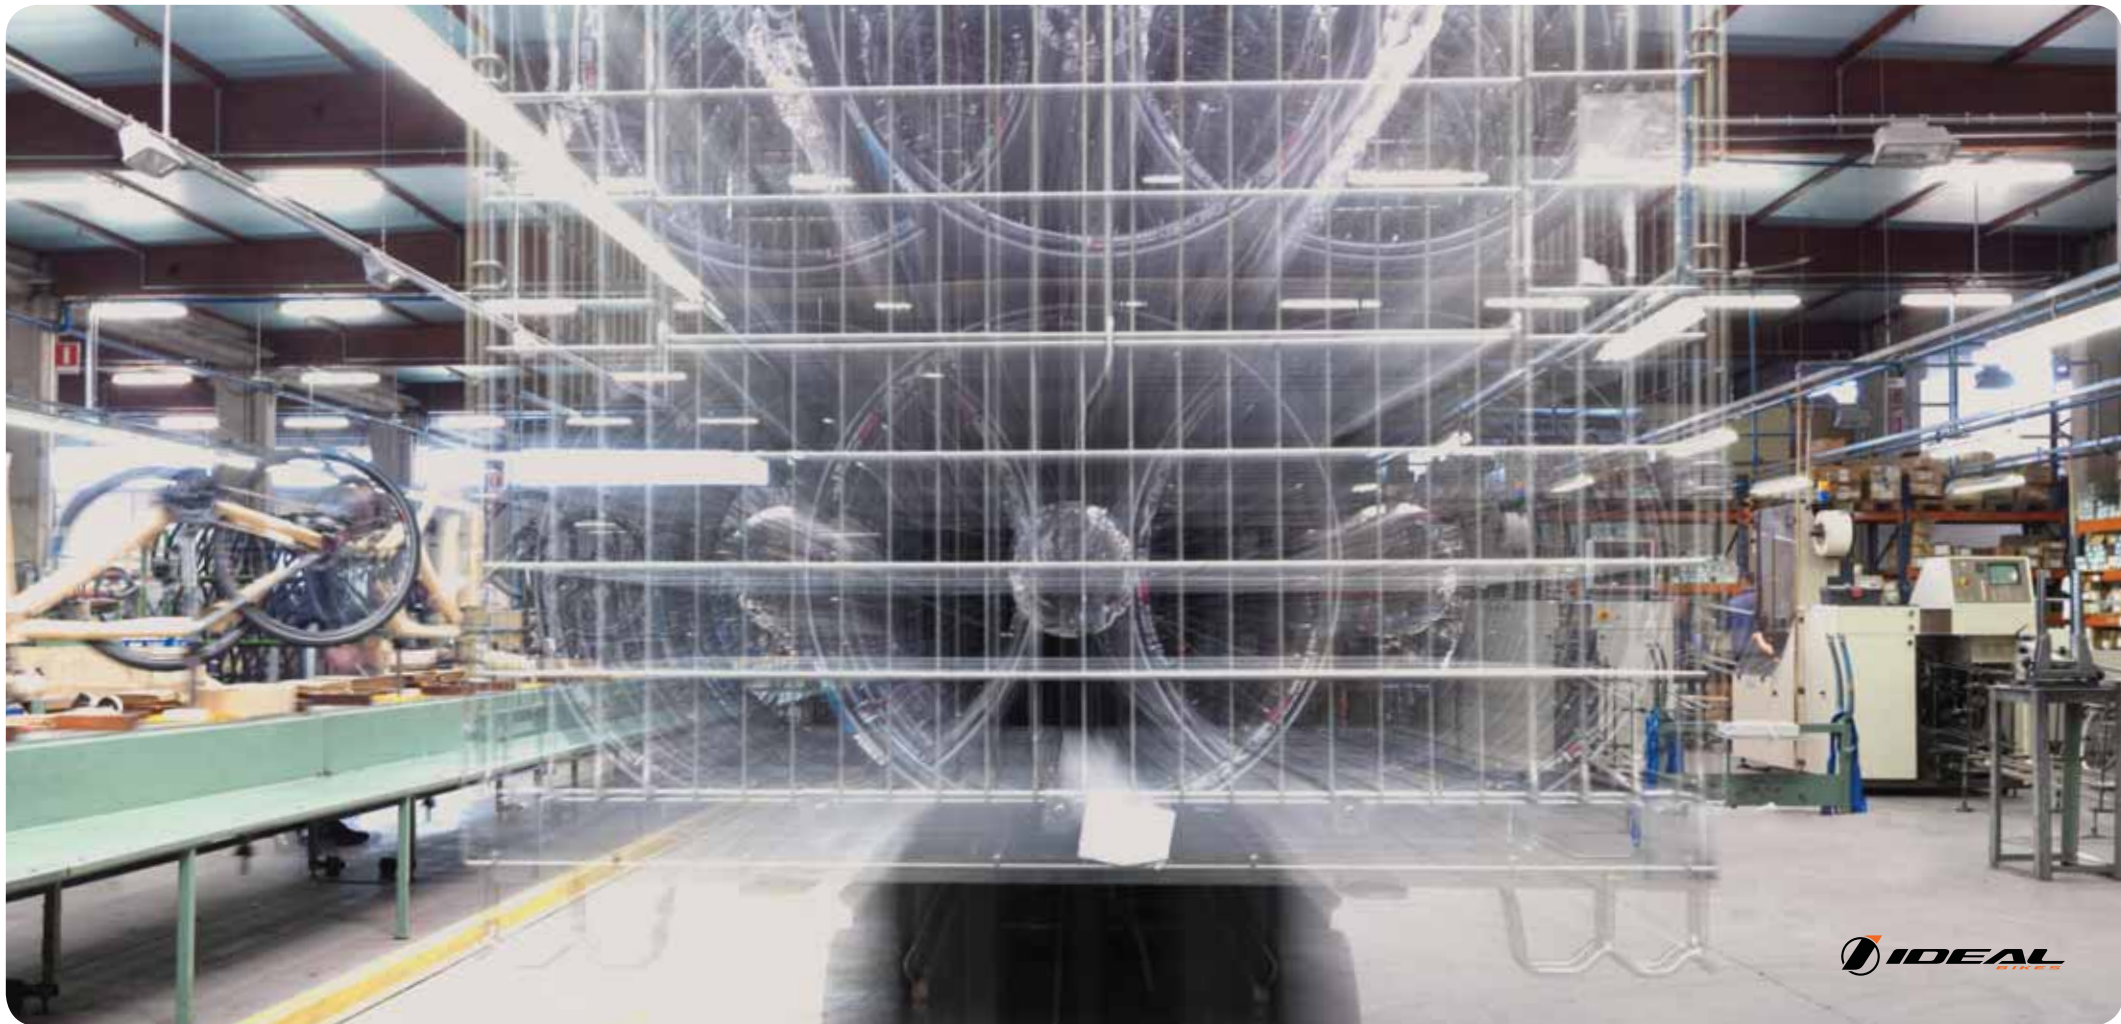

The IDEAL bicycles are designed in Greece by a dynamic team of engineers and designers whose primary concern is the end user. That is the “person” who will buy the final product, use and enjoy it. The safety, the aesthetics, the functionality and the reliability are the principles behind the design

process taking place in the company’s headquarters in Patras, Greece.

High Assembling Standards, Quality Control and After Sales Service are equally important factors of the company success.

The Outcome

Around 55.000 bicycles are sold each year to Greek cyclists and a lot of thousands to consumers in 19 European countries. These figures alone create a big responsibility for a company that continues to evolve and grow as time goes by, while maintaining a commitment to quality, safety, reliability and top price / value ratio.

While the trends and the development of the bicycle scene continuously change, there are values that remain – and must remain – constant: quality, safety, reliability. True to its heritage, which has established it as the market leader in the Greek market and a dynamic player in many countries in Europe, IDEAL presents with its range of models for 2014 an embodiment of the values mentioned above.

MTB - CROSS COUNTRY

By extending the range of mountain bikes with proposals in both the 27.5" and 29" categories, IDEAL now offers a comprehensive range of bicycles with different kinds of frames and technical specifications.

With carbon prevailing when it comes to the top models of the range and the high quality aluminum being selected as the best solution for the value-for-money models, the IDEAL mountain bikes are an extremely competitive proposal for 2014.

Trekking & Sport

IDEAL is a recognised company in the market for

many years in terms of quality-price ratio in the trekking and sport bicycles category. However, IDEAL does not rest on its laurels and for 2014 offers models that have already been identified as the new best sellers of the market. The quality of the frames in conjunction with the high level technical specifications, create top bicycles that are worth much more than their cost.

In the city with an IDEAL

While urban commute on bicycles gains ground among citizens in organized societies all over the world, IDEAL has designed high aesthetics city models, functional, price friendly and ready to serve the increased demands of the modern urban cyclist.

The joy of children

IDEAL does not "play around" when it comes to children bicycles. Safety is the number one factor when bikes are designed for the little future cyclists. Comfort and functionality are equally important since IDEAL's credo is that the first bicycle is a very crucial moment in a child life. And this is how IDEAL handles every bicycle.
